EXPERIENCE

UEM Jaipur ACM Student Chapter
Graphic Designer & Web Developer

Aug 2025 – Present
Jaipur, Rajasthan

- Designed marketing creatives, event posters, and social media assets for technical and community events.
- Developed responsive web pages using HTML, CSS, and JavaScript.
- Collaborated with designers and content teams to create engaging digital campaigns.
- Researched industry trends and contributed creative concepts for branding and outreach.

YouTube & Digital Content Creation
Content Creator & Podcast Promotion Specialist

Jul 2020 – Present
Remote

- Created educational and technology-focused content across YouTube and social media platforms.
- Built experience in audience growth, content strategy, thumbnail design, and digital marketing.
- Promoted podcasts and online brands through content campaigns.
- Utilized AI-powered tools for content generation and workflow automation.

PROJECTS

ReadmeSmith – AI README Generator
React, AI Integration, JavaScript, Vercel

2026

- Built an AI-powered platform that generates professional GitHub README files from project descriptions.
- Automated documentation creation workflows, reducing manual effort for developers.
- Implemented structured content generation and user-friendly interfaces for multiple project types.
- Deployed and optimized the application for fast and reliable performance.

Findo – Personal Expense Tracking Application
React, JavaScript, Frontend Development

2025

- Developed a web-based expense management platform for tracking income, expenses, and spending patterns.
- Implemented transaction categorization and financial summary dashboards for budgeting insights.
- Built responsive and user-friendly interfaces to improve financial record management.
- Enhanced user experience through intuitive navigation and real-time expense visualization.

FuncPilot – Automated Code Testing & Reporting Platform
JavaScript, Testing Tools, Web Development

2026

- Developed a platform that analyzes source code files and automates function-level testing workflows.
- Generated structured test reports to help developers identify bugs, failures, and code quality issues.
- Designed an intuitive interface for uploading code files and reviewing testing results.
- Improved debugging efficiency through automated validation and report generation.

ChangeOrbit – GitHub Commit Log Formatter
JavaScript, GitHub API, Frontend Development

2026

- Built a tool that converts raw GitHub commit histories into clean, readable, and professional changelogs.
- Integrated GitHub data processing to organize commit information into structured formats.
- Simplified project documentation and release-note generation workflows.
- Designed a responsive interface for generating and exporting formatted commit logs.

EchoToDo – Productivity & Task Management Platform

2026

HTML, CSS, JavaScript

- Developed a task management application focused on productivity tracking and workflow organization.
- Implemented task creation, status management, and progress monitoring features.
- Designed a clean and responsive interface to improve user engagement and usability.
- Enhanced productivity through structured task planning and visualization.

EDUCATION

University of Engineering Management (UEM), Jaipur

Jul. 2024 – Apr. 2028

Bachelor of Technology (B.Tech), Computer Science Engineering (AI ML)

- Relevant Coursework: Data Structures Algorithms, Database Management Systems, Object-Oriented Programming, Operating Systems, Computer Networks, Artificial Intelligence, Machine Learning

SKILLS

Languages: Java, Python, JavaScript, C

Web Development: HTML, CSS, React.js, Node.js, Express.js

Databases: MongoDB, MySQL

Tools: Git, GitHub, VS Code, Postman, Vercel

AI/ML: Generative AI, Prompt Engineering, OpenAI APIs, Machine Learning Fundamentals

Core Concepts: Data Structures Algorithms, OOP, Database Design, System Design
